

I'm Beatrice Njeri, I'm 21 years old and a student from the university of Nairobi. I'm in my second year, taking a degree course in psychology, sociology and history.

When I was in Form 3 in 2011, after I lost my grandmother who was my guardian and my breadwinner, I had no one to pay my school fees and also to provide my upkeep. I used to be sent to collect my fee, but there was none to pay for my fees, so I would just stay at home.

I turned to my close relatives who I thought could have helped but none could. My single mum could not help because she had a big burden of taking care of my 3 siblings, also she had no job and depended on manual labour which was unpredictable.

I thought of dropping out of school, so that I could look for job to get money to pay for my fees.

With much tears and sorrow God could hear my prayers, and He sent me Sonia who took up my burdens and placed them onto her shoulders. From that time, I was never sent home for fees.

MSCP has been a great help to me up to now. I bless the Lord for MSCP and the good work they are doing, I am this far because of MSCP; MSCP has restored my hope to live. I now feel like a person. It is in the university that I have discovered my potential. I am very determined to work for the betterment of the society by giving psychological counselling, maintaining law and order and by fighting for the rights of vulnerable in the society.
Thanks a lot.
