Mugure age 13 suffers from Epilepsy

Please help us to improve Mugure's quality of life.

Mugure is the eldest of 4 children living with a single mother in Molo.

Mugure has epilepsy and despite our best efforts has continued to live a miserable life.

Her mother does casual work and often Mugure is locked in the house. She is unable to carry out basic skills for herself and so is at the mercy of others. She has frequent epileptic fits because of poor consistency of receiving her medication. As the sole bread winner in the house, her mother is normally out looking for work as a casual labourer and is therefore not able to remain at home to care for Mugure.

She is open to being abused and from our observation has been sexually abused several times in the past.

Fortunately, Mugure has been offered a place at Matumaini Rehabilitation Centre where she will receive full care, but we need at least **£50 monthly** to pay for this. She will be able to live a more independent life as a result of the specialized care and education she receives at the centre and, her younger sister will have the opportunity to return to school having had frequent absences from school to help care for Mugure.
